Please see OSC request below. He is trying to clean to meet end points and new fresh tar balls are rolling in

Subject: UC approval needed to do split sampling of I,J, and K

Pat

I would like to initiate a sampling of Sections I,J, and K. We are experiencing a lot of increased re-oiling of rocks and beaches that we have cleaned.

I would also like to get a sample so we can get DNA in each area.

Please see attached pictures.

Would you like a formal 213 for this request, or can UC just issue the order.

At the current time Section J is the worst. But this is now happening in all areas.
